

Wind Potential Capacity at 110m Hub Height

35% or Higher
gross capacity factor

2013 US wind industry average turbine

Area (sq km)

0	200 - 300
< 100	300 - 400
100 - 200	> 400
Land exclusions	

This map illustrates general wind resource potential only and is not suitable as a siting tool. More detailed site and wind speed data, as well as coordination with relevant authorities, are needed to thoroughly evaluate appropriate wind energy development at any given location.
